How To Draw Sandy's Face On Model!

Don't do this!

too much chin and her hair is pointed in!

Eyes are filled in black and you forgot the lip line also that nose...

Jaw is funky and those eyebrows are filled in... No!!

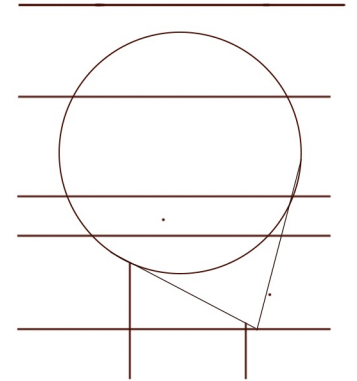

The only part of sandy's hair that points towards her face is her bangs! Make sure all of her hair Flips outwards (Like Farrah Fawcett)

Do this!!

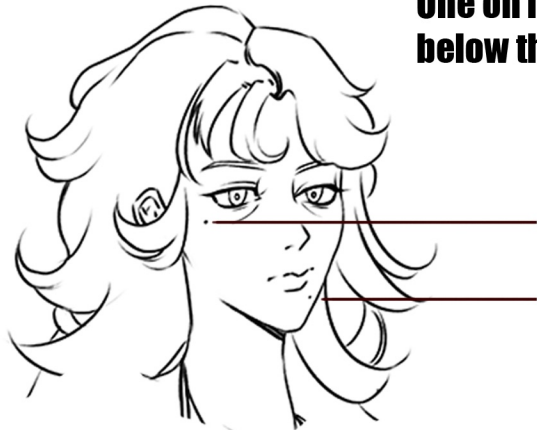

Break her down into simple shapes!

Sandy has two beauty marks

Watch out for her face proportions and make sure her chin is diamond shaped

One on her upper right cheek and one below the left side of her mouth

The cheek mark should match up with the end of her eyelash

The Lip mark should line up with the corner of her mouth

Sandy has a bad case of RBF and doesn't smile very often... Heres some ways to keep her neutral expressions interesting!

Keep in mind that shes a pretty angsty teenager, They tend to have a "really?" "ugh" "okay?..." expression on their face when they're around people they want to seem cool around or dislike

Ugh

Really?

Okay?
